

# My Photoshop Journey

A.K.A.

## My Journey Through the 7th Circle of Hell

Well I can't say it enough, this module has been an absolute nightmare for me. I'm not sure if it is because I'm on a MacBook or what, but when I tried to do the same things as were presented in the written directions as well as in the YouTube Tutorial, it often didn't work for me at all or I had to find a different way to do the same thing. I am by no means a tech person, so I am sure that that doesn't help.

### Tutorial #1-

I would make a little mistake and wouldn't be able to remove it, so it would resize or delete a portion of my attempt and then I was unable to retrieve the original. Hence I had to start all over again. This is what was born after attempt five or six.

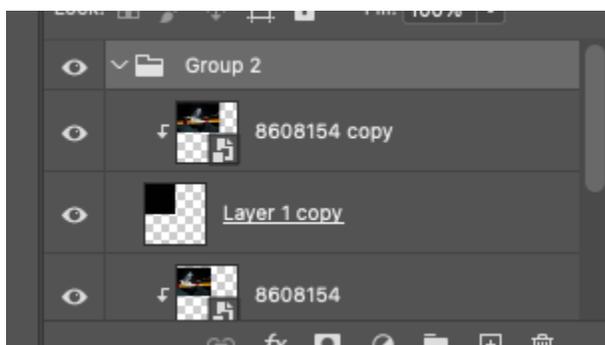

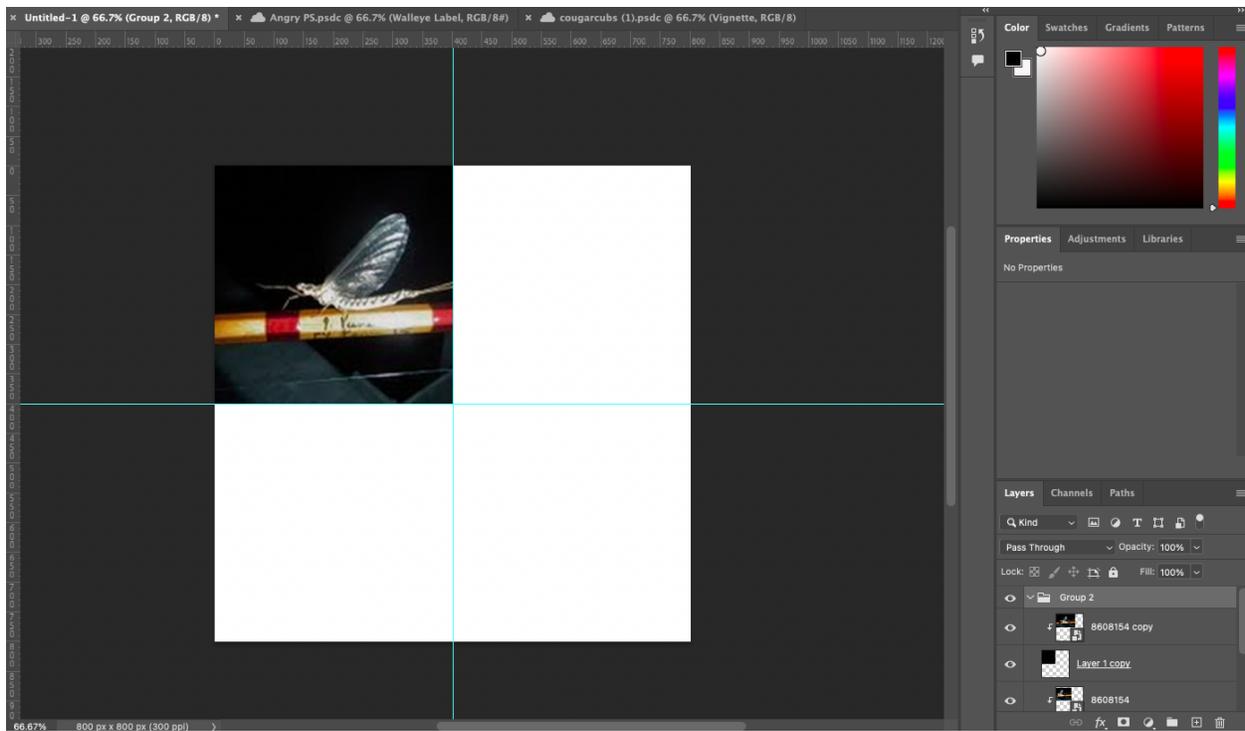

### Tutorial #2-

This one was easier to follow along with and complete. While the clip was just over ten minutes, it took me at least an hour to complete. Again, I am about as technologically advanced as a rock. This was the result of that effort.

### Tutorial #3-

Can anyone say nightmare!? I work on my classes in my workshop, which is about seventy yards away from my house. That being said, I think my wife and daughters heard me say every single profanity that I knew during this effort. There are going to be two pictures to accompany this entry because, technically, I never finished it. I could not figure out how to get the Group #2 to be able to drag to the second quadrant. The program would not duplicate the same image in order to be moved. I tried a dozen different times and made sure that my settings were the same as in the tutorial, but to no avail. As you can see from the pictures below. I will need to make another attempt at some other time.

#### Tutorial #4-

This tutorial was quite a bit easier to follow and didn't seem to have any issues between a PC and a Mac. One thing that I am noticing is that to start off any new Photoshop project, when I hit "NEW", I am not given the same options at the beginning of each of the tutorials. I'm assuming that this is a compatibility issue with a Mac. For some reason I cannot just pull up my final results in a search, so I have been taking screenshots of the final product. Please find my results from this tutorial.

Tutorial #5-

In the end this was probably my favorite of the five options. It actually seemed to make more sense to me than the previous four. By making sense, I just mean that the directions were clearer and easier to follow. I also really liked this end result.
